0 0.25 0 The **CLUE SHEET** below - helps you figure out if the checkpoints you locate are the correct ones. Visit each checkpoint in order (1-9). When you find the checkpoint, see if the two digit post number matches the clue sheet; if it does, you are at the correct checkpoint. Write the letter printed on the post in the blank column. Once you've

located all the checkpoints and solved the Park's

word puzzle go to the Nature Center and unlock

Helpful hints

Use your legend to understand features on the map.

The contour lines will help you understand the landscape. If the lines are closer to each other that means the terrain is steep. If the lines are farther apart that means the terrain is not as steep. Reading the contours are important in deciding whether or not you want to go up and over a hill or whether you want to go around it.

The intermediate course length is measured as the crow flies. This means that depending upon the route you choose from one checkpoint to the next the actual distance traveled may be longer than indicated on the clue sheet.
