

Controls	Straight line Distance	Magnetic bearing to next control
1 to 2	108 meters	255°
2 to 3	96 meters	013°
3 to 4	303 meters	135°
4 to 5	119 meters	074°
5 to 6	90 meters	019°
6 to 7	61 meters	120°
7 to 8	164 meters	115°
8 to 9	124 meters	253°
9 to 10	103 meters	275°
10 to 11	195 meters	320°
11 to 12	72 meters	233°
12 to 13	59 meters	320°
13 to 14	95 meters	274°

Permanent Orienteering markers are mapped as an upward pointing arrow: ↑
 The permanent markers are a vertical post painted orange and white with the control number on the post.

Start at marker #1 which is located between the maze and the pool. Use your compass and pace count to go to each marker in sequential order (1,2,3,...) until you get to marker #14 which is the last marker. Use the chart in the upper right corner of this map to determine the magnetic bearing and distance to the next control. Hint: 1 meter is just a bit longer than 3 feet.
